

## Algebra Homework Format

The purpose of homework is to correctly practice the skills used to solve a problem within a particular concept, **not just to get the final answer**. Neatly showing your work and including all of the steps to solving a problem are the most important aspects of the assignment.

\*ALWAYS IN PENCIL\*

write  
problem

↓  
show  
work

box  
answer

skip  
one line  
after  
each  
problem

HW # pg.	Date
1. $4(x+2)$ $[4x+8]$	
2. $-2x + 4x = 8$ $\begin{array}{r} x \mid 3 \\ -2 \mid -8 \\ \hline 1 \end{array}$ $\boxed{2x=8}$	
3. $\frac{1}{3} \cdot \frac{5}{1} = \frac{5}{3} = 1$	

continue  
to this  
column  
when first  
column is  
full.
